Note:

If you are unable to access Windows 10's pre installed Skype with this 4K webcam, please go to the Skype official website to download the desktop version.

Make sure that you plug the webcam directly into your computer, NOT a USB hub. USB hubs are often too underpowered to operate a webcam.

If your webcam's microphone isn't working, you need to disable the built-in camera or microphone of your PC itself on the device manager, then enable the webcam's microphone.

For desktop, it is recommended that customers use the USB interface on the back of the computer, the stability will be better.

The maximum resolution of some software or screens only supports 1080P or 720P, In order to enjoy Ultra clear 4K 8 megapixels image or video of this webcam, Please make sure your software and screen support 4K.
